

Body

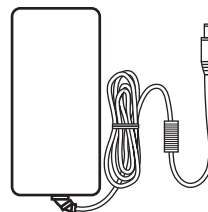

Monster Tamper Pro

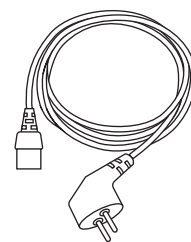

Gus Tamper Pro

other Components

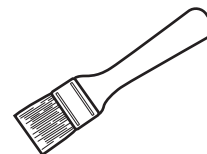

free-voltage
adapter X 1

power cable X 1

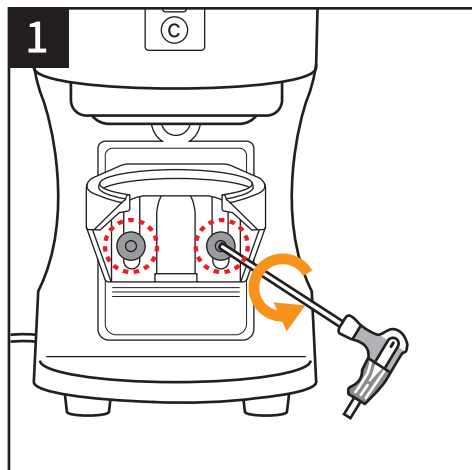

hex keys wrench X 1

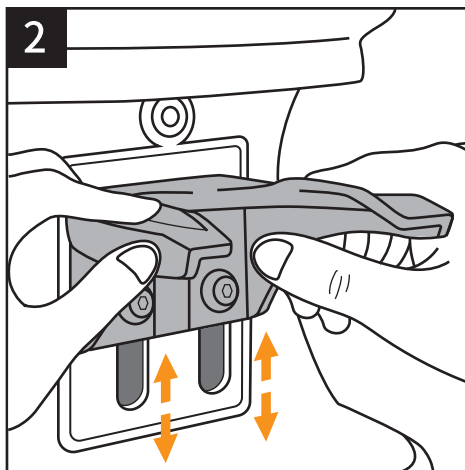

brush X 1

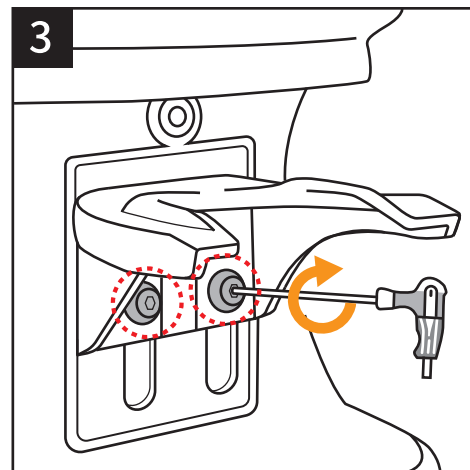

Setting up and Using

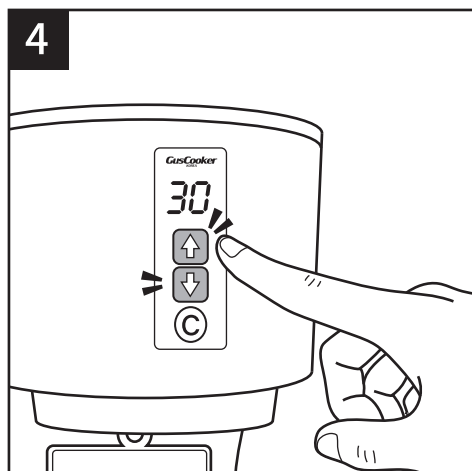

Use the enclosed hex wrench to loosen the hex screws on the front of the Tamper.

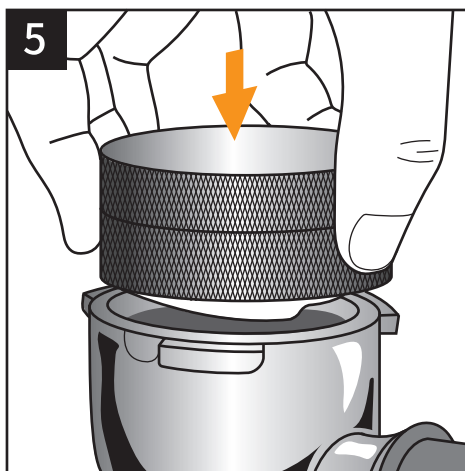

Adjust the stand height with both hands to fit the portafilter. (make sure it fits perfectly!)

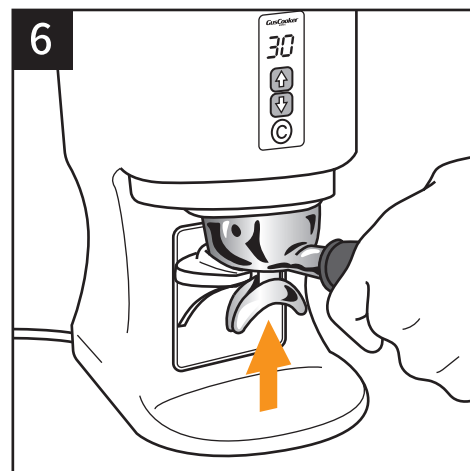

Tighten the hex screw again with the hex wrench.

Control the pressure using the arrow button (↑ ↓) on the top of the Tamper.

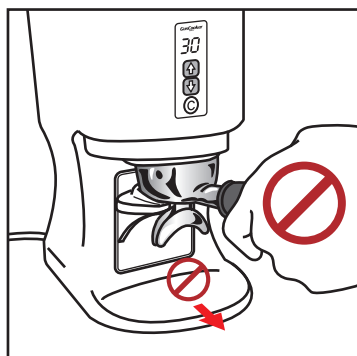

Level using a Distribution tool.

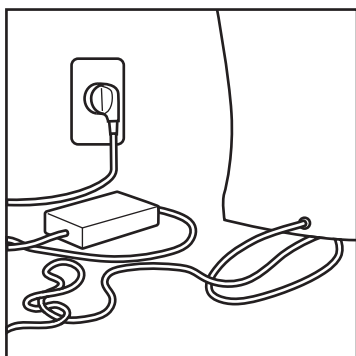

Push the portafilter all the way down to activate the hammer automatically.

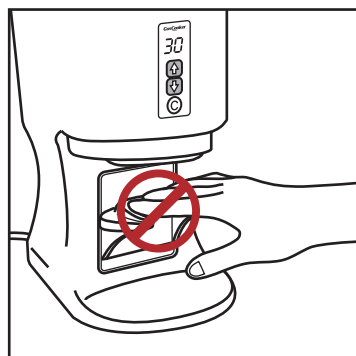

Precautions

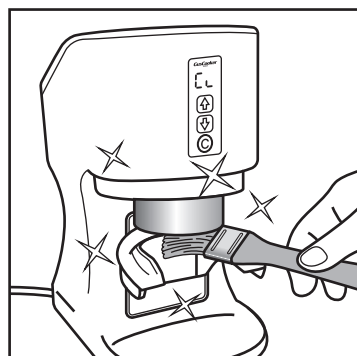

Do not remove the portafilter before tamping is complete.

Be careful not to bend the connected cable.

Do not insert your hand inside the stand.

Clean the hammer periodically.

Specifications

GUS TAMPER PRO		MONSTER TAMPER PRO	
Model No.	GUS-TP1	Model No.	GUS-TP2
